Listing of Claims

1.-11. (Canceled)

12. (Previously Presented) An adhesive skin patch comprising: a base material; and a medicated layer provided on one surface of the base material and comprising 100 parts by weight of a pressure-sensitive adhesive, 1 to 75 parts by weight of a resolvent with respect to 100 parts per weight of said pressure sensitive adhesive, and tulobuterol, the resolvent comprising an aliphatic alcohol having a branched-chain structure or a double bond in its C8 to C30 carbon chain, and the pressure-sensitive adhesive being a copolymer obtained by copolymerizing monomers comprising 70% by weight or more of an alkyl(meth)acrylate whose alkyl group has 6 to 20 carbon atoms, wherein the pressure-sensitive adhesive is a copolymer obtained by copolymerizing monomers containing 2-ethylhexyl(meth)acrylate and an alkyl(meth)acrylate whose alkyl group is linear and has 6 to 20 carbon atoms.

13. (Original) The adhesive skin patch according to claim 12, wherein the monomers comprise 70 to 95% by weight of 2-ethylhexyl(meth)acrylate.

14. (Original) The adhesive skin patch according to claim 12, wherein the monomers comprise 5 to 30% by weight of an alkyl(meth)acrylate whose alkyl group is linear and has 6 to 20 carbon atoms.

15. (Original) The adhesive skin patch according to claim 12, wherein the monomers contain 70 to 95% by weight of 2-ethylhexyl(meth)acrylate and 5 to 30% by weight of an alkyl(meth)acrylate whose alkyl group is linear and has 6 to 20 carbon atoms.
